DETAILED ACTION

Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the actuator (cl. 1, 6, 19) & hydraulic actuator (cl. 4, 11, 20) must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-2, 4-6, 8, 10-11, 13, 15-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hansen (3286862), in view of Mooney et al (6119847). Hansen discloses the claimed invention as also shown for clarity in the marked drawings below, except for the foldable unloading auger as claimed.

Art Unit: 3671

Outfeed auger section

Substantially vertical infeed auger section

Spout for preventing spilling

Art Unit: 3671

Mooney discloses, in col. 1, lines 48-59) that it is known in the art to provide a (any number of them) foldable outfeed auger actuated by a hydraulic cylinder.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the outfeed auger of Hansen with foldable feature taught by Mooney, since it is desirable to provide an auger type conveyor with foldable feature to fold them into a relatively compact unit where a hydraulic cylinder provides motive force to effect the folding operation (Mooney, col. 1, lines 48-59).

Art Unit: 3671

Response to Arguments

4. Applicant's arguments with respect to claims 1-2, 4-6, 8, 10-11, 13, 15-20 have been considered but are moot in view of the new ground(s) of rejection.

Art Unit: 3671

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Thomas et al., Dillon et al..
